Cherry Street Live-Works, Groveland, Florida

Located in Downtown Groveland, Florida, the Cherry Street Live-Works are envisioned as an urban six-unit building with ground floor office and retail uses, and townhomes on the upper floors. Architecture which reflects Florida's culture, history, and climate provides generous outdoor space in the form of upper floor balconies, and covered ground floor open-air galleries. Outdoor seating and native landscaping around the building create a distinct sense of place.
